

Ferdie James Nervida

Blockchain Forensics Specialist | TEDx Speaker | Cybersecurity Educator

Ferdie James Nervida is one of the emerging voices in blockchain forensics and cybersecurity education in the Philippines. A TEDx speaker, public sector advocate, and digital threat researcher, he has traced illicit transactions, dissected smart contract exploits, and delivered over 100 talks and trainings

across schools, government institutions, and tech events.

With a strong background in investigative blockchain analysis, Ferdie has worked with global cybersecurity firms like AnChain.AI, focusing on tracing crypto crimes involving fraud, money laundering, and national security threats. In 2024, he co-founded the Blockchain Practitioners Association of the Philippines to help equip Filipino freelancers and professionals with practical Web3 skills.

In recent years, he has spoken at national events such as the Blockchain Campus Conference 2024, the Philippine National Police Leadership Training Seminar, and DICT's GenConnect Project—where he toured multiple cities in Mindanao delivering blockchain education to student leaders and LGUs.

Ferdie is also the founding director of the Blockchain Policy Institute, a non-profit think tank that drafted a proposed regulatory framework for cryptocurrency oversight in the Philippines. His thought leadership in digital policy bridges the gap between government and emerging technologies.

A former business owner and TEDx speaker on personal development, Ferdie integrates blockchain education with real-world stories of grit, growth, and responsibility. His talk "Upskill Yourself, Upgrade Your Life" laid out the four pillars of personal growth: mental models, lifelong learning, growth mindset, and continuous improvement.

He is currently pursuing his Master in Public Administration at Ateneo de Davao University and holds certifications in INSEAD Blockchain Revolution, Lean Six Sigma, Google Cybersecurity Professional Certification and Google Project Management. He continues to work closely with both public and private institutions to raise awareness about cybersecurity and the evolving risks in Web3.

Speaking Packages

Type of Engagement	Audience Size	Duration	Rate (PHP)
Keynote Talk	Any	30-45 mins	P25,000 - P40,000
Seminar or Training (Half Day)	Up to 200 pax	2-3 hours	P50,000 - P70,000
